

Lyrical Engineer

Gen 1:1, Gen 6:14-16, Mat 7:24-27

Written/Performed by: Only Won

Produced by: Maximillian

Hook:

See I be that Lyrical Engineer
Only the technically minded will know what I'm talkin' about
here (2x)

Yawn 6am gotta get outa bed
got this funny feeling comin' straight out my head
Waiting for the alarm, ready to start a new day
But it's tough cuz I was up all night on Ebay
and playing video games, you know I hooked up my Atari.
to the surround sound system and HDTV
beepbeepbeep oh that be my Palm Pilot
don't tell me I can't see it cuz I got small eyelets
Gotta put on my glasses, been wearing them since six
can barely see my kicks, thinkin' about getting lasix
so I can see my degree, got my bachelors in ME
took the EIT, now I'm a licenced PE
Kickin it w/ EE's & CE's at NEC and HP
I'm the Overachieving Geek...AKA the OG!

Hook:

See I be that lyrical Engineer
Only the technically minded
will know what I'm talkin' about here
It doesn't matter how you look or the clothes that you wear
All that it matters is that you're technically aware
See I be that lyrical Engineer
"Fluid dynamics, quantum physics"
See I be that lyrical Engineer
"Electrical circuits, Thermodynamics"

Gotta make that commute to the Silicon Valley
Took a detour so had to use my Rand McNally
but I had it on my laptop hooked to the GPS
Don't need commuter stress, gotta swerve with finesse
Bluetooth headset on so I can drive with both hands
Gotta hurry to the office, got wires to land
Red stapler in office in my 6x6 cubicle
Office space and Dilbert be my American Idol
Leaning to the side in my Lincoln Navigator
moving much faster than a particle accelerator
SLAM! I feel like atoms being collided
With holy hip hop, you gotta bump it when you ride it
Oh wait, got no gator, Got the VehiCROSS concept
An engineering marvel you best not take a wrong step
I got Torque on Demand with cutting edge propulsion
Standard with a computer controlled variable induction
Hittin' the beats...man, only God can engineer this
you better turn this up in case you can't hear this

Hook:

See I be that lyrical Engineer
Only the technically minded
will know what I'm talkin' about here
It doesn't matter how you look or the clothes that you wear
All that it matters is that you're technically aware
See I be that lyrical Engineer
"Mechanics of materials, Robotics, statics"
See I be that lyrical Engineer
"Heat Transfer, Magnetics, Vector Mechanics"

Ya know it's tough being an engineer
Designing gears and calculating elasticity of shear
I can't go on dates cuz my design project's late
Be workin' onsite till quarter past 8
or 9...sometimes even past midnight
Technicians be trippin', tellin' me that my beat's tight.
Better (gotta) put on my bunny suit in that clean room
environment
(pause) Class 1 fab with no particulates or allergens...work
on servos in the motors and Robotics with encoders
got body odor, need a shower, got no time for free loaders
I must say I'm thankful; God's blessed me with a mind
With AutoCAD I can design a machine right on time
Need to design a ship that can go faster & faster
So that maybe one day I can finally work for NASA
whew Gotta get my head out that panel
so I can finally go home and watch Discovery Channel

Nutty Professor:

"You see what we're talking about goes beyond our
comprehension in the normal sense. Intellectual design is
most prevalent among us. You see w/ the speed of light, the
implementation of the universe was set forth. Intricate
circuitry was integrated into our biological development.
Statistical, physical, or intellectual processes could never
create or predict the world as you perceive it today."

18 yrs of rappin' but may never see the Grammys
But at least I can understand thermodynamics
2 yrs of Calculus solving differential equations
I be that lyrical engineer with that Asian persuasion
Sometimes I be chillin' and be listening to the news and
thinkin' about theories and the principles of Cold Fusion
Might look like a nerd, and not a babemagnet
But got more toys than inspector Gadget
Like I don't use film cuz my camera's strictly digital
wouda been a miracle to get a JPEG of Jerrico.
So when will girls call me? When they can't boot their PC's?
Sorry Ladies, I'm goin' back to my Atari!
